

YOU DESERVE THE BEST SECURITY

SECURE BY DESIGN - THE FOUNDATION OF IOT SECURITY

Kev Hau | Head of Security Engineering, North Asia

Cybersecurity Evangelist, Office of CTO

IOT CREATED POSSIBLE IMPACT TO BUSINESSES

IOT HELP WITH ESG PERFORMANCE

IOT DEVICES ARE EASY TO HACK INTO

Run on Legacy OS

Difficult to Patch

No Built-in Security

Unchanged Password

Physically accessible

2017

LG ROBOT VACUUM

- HomeBack vulnerability
- Account takeover
- Spy on users' home activities

2018

ALL IN ONE PRINTER

- Fax number
- Device takeover
- Network backdoor

2019

CANON DSLR CAMERA

- PTP
- Buffer overflow vulnerability
- Malicious firmware install
- Encrypt the pictures

2020

PHILIPS HUE LIGHT BULB

- ZigBee protocol
- Remote exploit
- Device (bridge) takeover
- Network backdoor

EXPLOIT IOT VULNERABILITIES

Risk to IOT Devices
Manipulation, Downtime, Damage

Network Backdoor
Lateral movement to other network elements

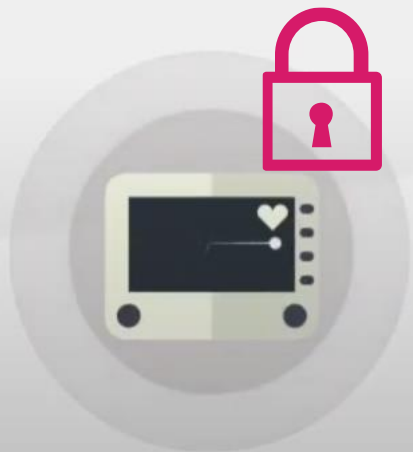

INDUSTRIAL

SMART OFFICE

IOT SECURITY REPRESENT A NEW FRONTIER

HEALTHCARE

SMART BUILDING

CUSTOMER'S SECURITY PROTECTION ON THEIR DEVICES

- Antivirus is a baseline
- Use disk encryption
- Host based IPS
- NGAV enhancement
- EDR enhancement

- Mobile device management
- Secure container
- Mobile threat defense requirement is growing

Missing Piece

Log4j

Spring Framework

A lot more vulnerabilities on the Windows and Linux OS

Microsoft Print Nightmare

50% devices are protected

How about another 50% or even more?

PROTECT IOT FROM INFRASTRUCTURE PERSPECTIVE

YOU DESERVE THE BEST SECURITY

VISIBILITY

Extensive visibility of your environment including the devices detail, security flaw, communication flow, and malicious intent activities

ENFORCEMENT

Automated access control and threat prevention applying zero-trust control with minimal effort

RESPONSE

Automated response processes that dramatically reduce your response times

- Device Attributes
- Risk
- Security Flaw
- Baseline Security Policy

SECURE BY DESIGN

YOU DESERVE THE BEST SECURITY

Software and hardware
development that seeks to make
systems as free of vulnerabilities
and impervious to attack as
possible

YOU DESERVE THE BEST SECURITY

Device

App Backend

Telemetry Data

Console App

DATA ANALYTIC

ARTIFICIAL INTELLIGENCE

Multi-Cloud

Containerized Application

Serverless Function

API

CLOUD APPLICATION ARCHITECTURE

Greater Personalization

Better Customer Experience

Automation and Quality Control

Improve Risk Management

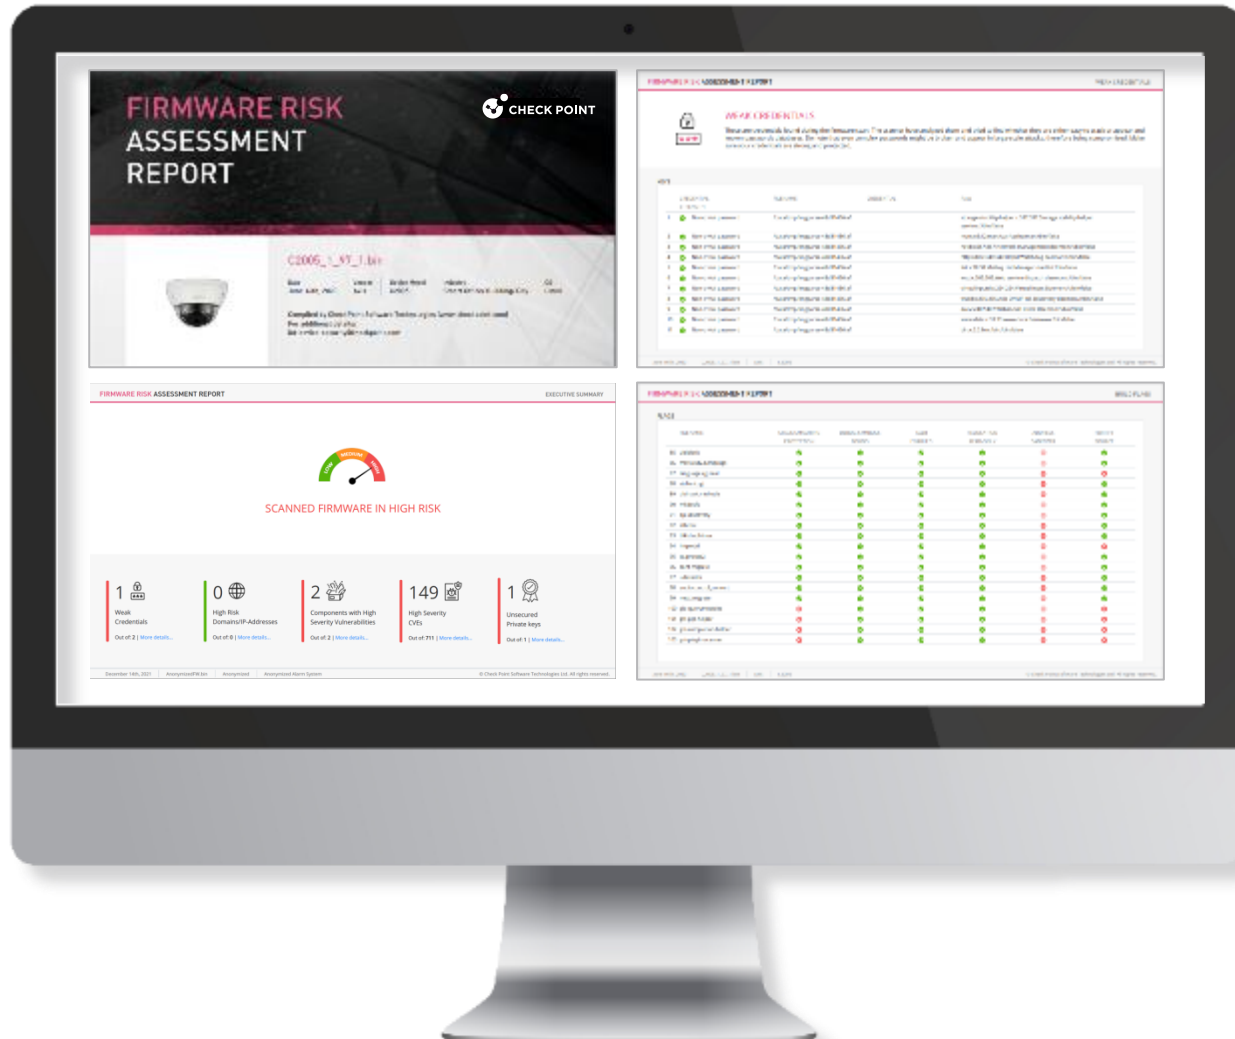

Improve Business Workflow

Enhance ESG Performance

DEVICE

YOU DESERVE THE BEST SECURITY

UNCOVER DEVICE-SPECIFIC SECURITY RISKS

Weak/Known Credentials

Known Vulnerabilities (CVEs)

SWM configurations

Suspicious Listed Domains

Unsecured Private Key

ON DEVICE RUNTIME SELF-PROTECTION

NANO AGENT SECURITY

Any Linux OS

- ARM32 / ARM64
- X86 64bit

Cloud Based Management

Security Built into Device
Storage & RAM Starting at 1MB

- Access Control
- Memory corruption
- Shell injection
- Import table hijacking
- Control flow hijacking

CONSOLE APP

YOU DESERVE THE BEST SECURITY

MOBILE APPLICATION SECURITY TEST

Analyze and Identify Risks in the Mobile App

SECURITY & VULNERABILITIES
ANALYSIS

PRIVACY ISSUE
ANALYSIS

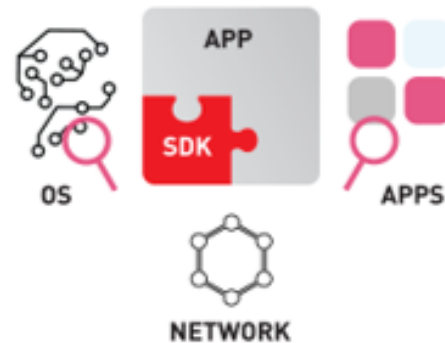

RUNTIME PROTECTION

Add Security Logic into your Mobile App

SECURITY SDK
INTEGRATES WITH APP

SDK SCAN FOR
THREATS

APP ENABLES
BUSINESS LOGIC

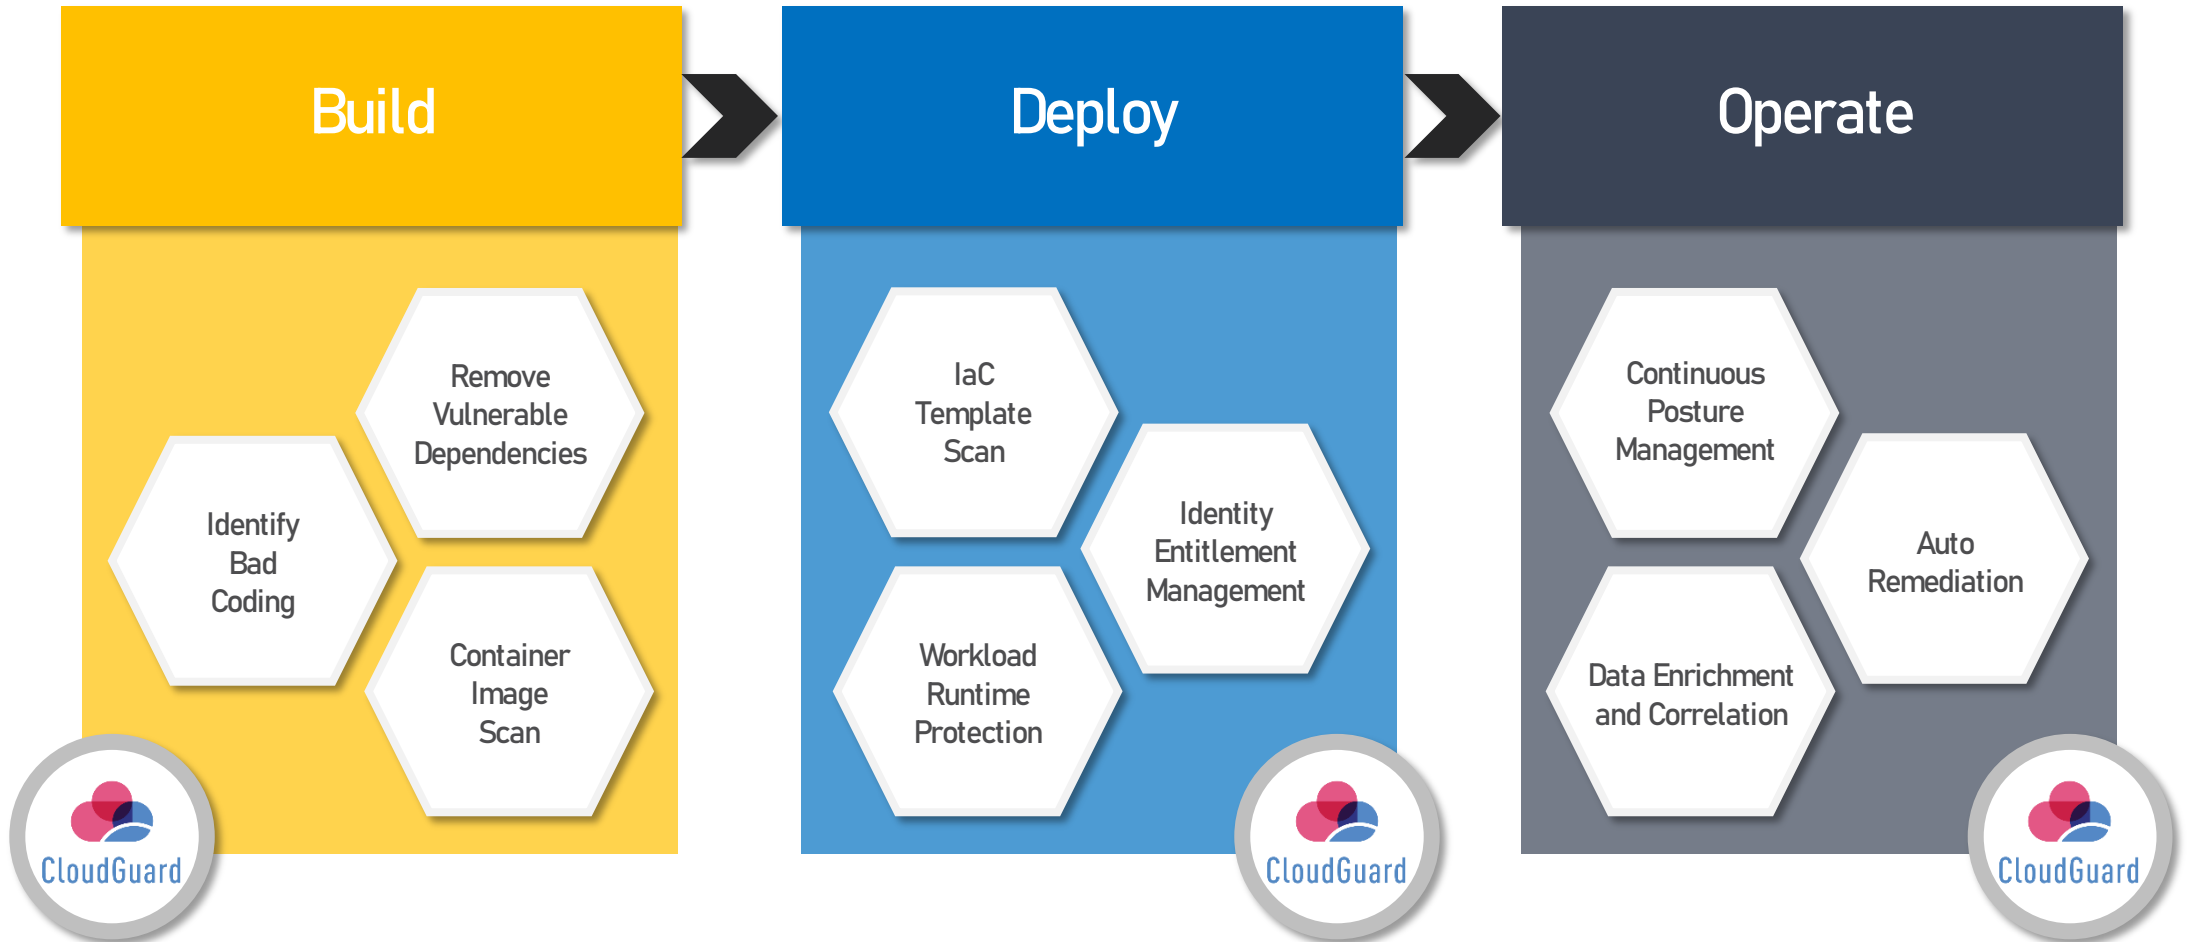

APPLICATION BACKEND

YOU DESERVE THE BEST SECURITY

APPLICATION SECURITY

Security measurement at every stage of SDLC

CASE SHARING

YOU DESERVE THE BEST SECURITY

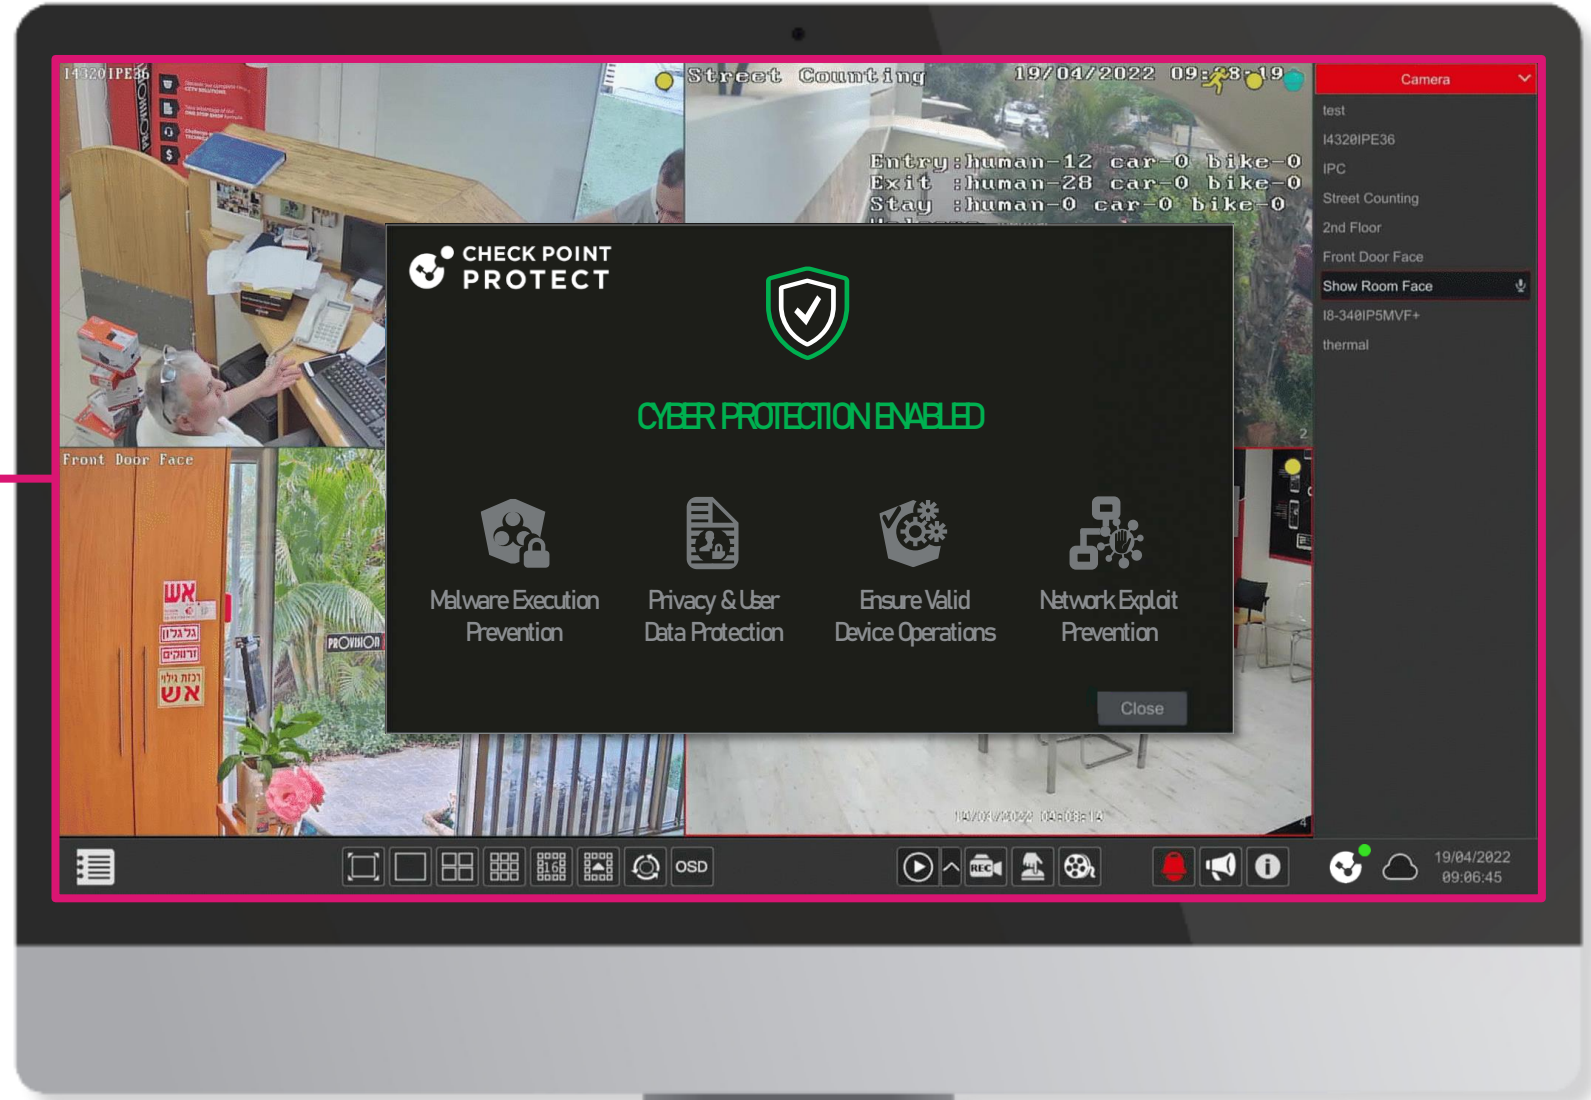

CHECK POINT + PROVISION-ISR

Simple & Secure IP Surveillance for Any Organization

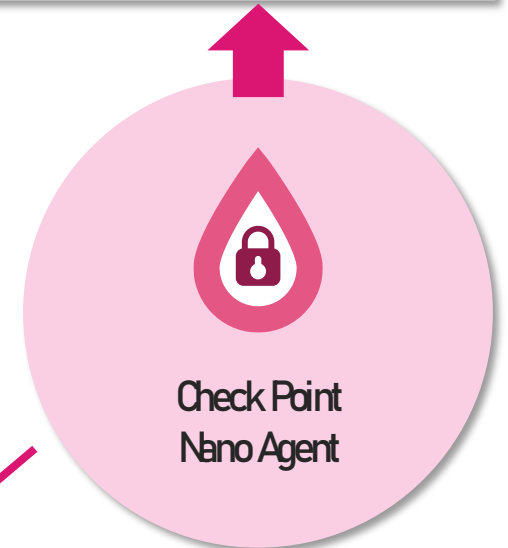

PHYSICAL & CYBER security COMBINED

CASE IN HONG KONG: DEVICE RUNTIME PROTECTION FOR 5G CPE

Identify any potential risk in their firmware, integrate this capability into their development lifecycle

Device runtime protection (Powered by Check Point), increase their customer confidence to use their product

- On-device runtime protection
- Minimal impact on device performance
- 100% firmware coverage (including 3rd-party components)

THANK YOU

YOU DESERVE THE BEST SECURITY
